## WSN Clearview™ Digital Signature Module

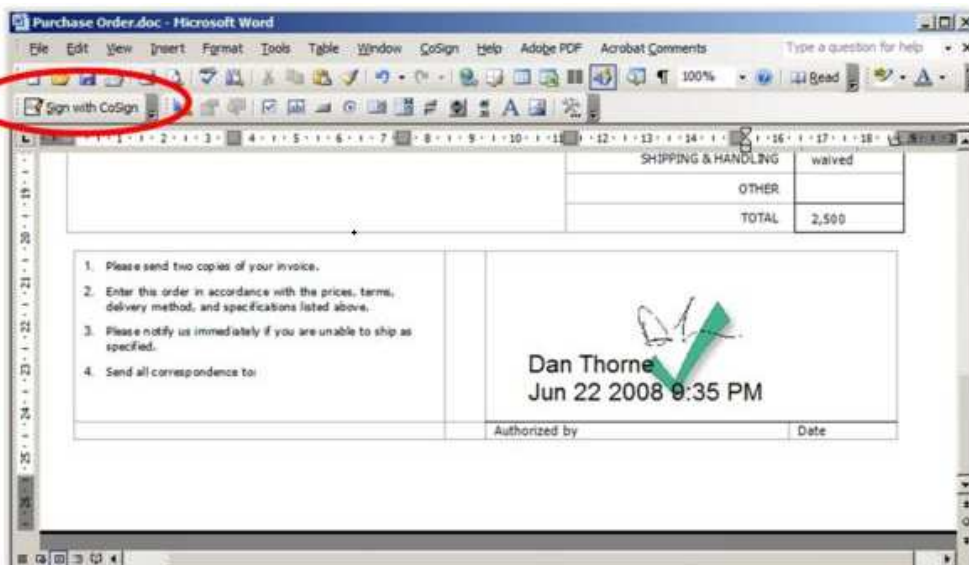

We have integrated the most widely used digital signature solution in the world into WSN Clearview ECM. Millions of signers at security-minded business, governments and cloud services around the world are already using the proven CoSign digital signature solution to automate their signature-dependent processes and are gaining numerous benefits that other digital and electronic signature providers simply cannot match. Despite the fact that electronic documentation permeates every aspect of the business workflow, the PSS (Print > Sign > Scan) problem persists everywhere. Solving your content workflow challenges is why we have chosen to integrate the number one solution into our innovative ECM solution.

### Values and Benefits

- Seamless Integration with WSN Clearview ECM
- Support for our Desktop, Web and Mobile Applications
- Works with your existing authoring applications, workflows and EXMs. It adapts to your existing Policies, Procedures, and even Authentication mechanisms
- Centralized management over your users, Certificates/Keys, and the signed content

### Signing a document is done in 3 simple steps;

1. Open the document you wish to sign.
2. Place the cursor in the desired location of the signature
3. Click the 'Sign with CoSign' button in the tool bar.

### Specifications

Operating System:  
Microsoft Windows XP / 7 / 8 (32/64 bit)

System RAM: 2 GB:

System Processor: Dual Core 1 GHz

Imaging Support: TWAIN or ISIS  
Compatible Imaging Device

Requirements: WSN Clearview™  
Application Server
