product datasheet

WSN Clearview™ Federated Search Server

Various studies have concluded that information workers are spending on average 8 to 10 hours per work week or about 25% of their time locating the content they need to perform their jobs. This costs an employer \$15,000 per year for an employee earning an annual salary of \$60,000. This is primarily due to poor content classification, governance and inadequate search solutions. You can eliminate this problem from your organization by implementing our WSN Clearview™ Application Foundation Server for ECM and our Federated Search Server (CVFSS) to create a powerful content management and search solution resulting in federated capabilities across all of your repositories. WSN Clearview ECM provides information workers with lightning fast simultaneous searches and intelligent presentation of the search results with our unique iFolder search "hit-list". The Federated Search Server is able to search for electronic documents and data from any system while following your security schema. This dramatically reduces the amount of time your workforce will spend searching for information. It's a no-brainer decision for instant ROI - straight out of the box!

Values and Benefits

- Scalable High-Performance Indexing
- Ranked Search Results—Best Results First
- Search Suggestions with Typo Tolerance
- Multi-index Searches with Merged Results

"One of the most interesting things about the Clearview solution is the extent to which Clearview leverages SharePoint Server and the Microsoft Office system – not just as a platform for delivering core ECM functionality – but also as part of the core user experience.

The integration of SharePoint Server and the Office system is pretty much seamless and delivers the power of both the SharePoint Server and Office system document management features in a very comprehensive, Microsoft-oriented user experience."

Ron Sielinski
Senior Product Manager—Microsoft Office Business Platform

Specifications

Operating System: Microsoft Server 2008, 2012 (32/64 bit)

System RAM: 4 GB

System Processor:
Dual Core 1 GHz or Faster

Requirements: WSN Clearview™ ECM Application Foundation Server

About WSN

WSN's Award Winning Clearview Software solutions are the leading SharePoint-based ECM solutions designed for today's demanding business world.

WSN's leadership team combines years of industry experience with the latest Microsoft technology architecture and innovation to bring to market a new standard of excellence for Solutions, Services, and Customer Care.
