

One of the most intriguing and exciting aspects of the Clearview 2012 Enterprise Content Management (ECM) solution is the revolutionary Clearview IRISS desktop gadget.

The IRISS—which stands for Integrated Repositories, Integrated Search and Storage—is designed to promote widespread usage of basic content management across every desktop in your organization without high deployment or training costs.

With the desktop gadget, documents can be easily accessed from virtually any desktop business application without complex scripting or programming. It truly changes the way information workers access business information so you can enhance business decisions, enable collaborative efficiencies, and elevate levels of Customer service.

The innovative IRISS gadget floats  
on your desktop, just waiting to be activated

## Values and Benefits

The IRISS desktop gadget promotes a new and simple user experience that has never been seen before in the ECM market. Information workers will not only be able to quickly access and store information with unprecedented ease, but they will have fun with the technology, too!

**To promote maximum deployment for casual users**, the desktop gadget can interact with either the full-featured Clearview Client, the Web Client, or function independently as a standalone, lightweight desktop application, complete with its own built-in content ECM viewer.

**With a user experience inspired by Windows 8**, the IRISS desktop gadget can be set at varying levels of opacity—from transparent to opaque—to provide a quiet, distraction-free service that is ever-ready to retrieve (search) or store your organization's content.

**Search criteria can be quickly and easily selected from virtually any business application running on the Windows desktop environment**, and then dropped onto the IRISS for immediate access. This delivers out-of-the-box integration with your business applications without implementing expensive and complex programming or custom scripting interfaces. Documents, email messages, and other content objects can be effortlessly stored in Clearview using familiar drag-and-drop techniques.

**The Scan to Clearview feature allows users to perform a scan** directly into the Clearview system from the IRISS.

**The Content Preview view from the IRISS allows users to see a small view of each document in a slide deck.** Users can cycle through the result documents and easily choose the items they're interested in.

**Specifications:** Operating System: MS Windows XP / 7 / 8 (32/64 Bit)

Imaging Support: TWAIN or ISIS Compatible Imaging Device

System RAM: 2GB System Processor: Dual Core 1 GHz

Requirements: WSN Clearview Application Server

## About WSN

WSN's Award Winning Clearview Software solutions are the leading SharePoint-based ECM solutions designed for today's demanding business world.

WSN's leadership team combines years of industry experience with the latest Microsoft technology architecture and innovation to bring to market a new standard of excellence for Solutions, Services, and Customer Care.

*"We were truly impressed by the new Clearview IRISS desktop gadget technology. We thought that the IRISS would have such a positive impact on how our users interact with documents and content on the desktop that we selected the Clearview ECM solution over products offered by alternative vendors.*

*The IRISS provides a fast and easy way for end users to access archived documents. This will enable greater use of the image (content) solution platform across our company, providing greater efficiency and improved transaction quality."*
