

The WSN Clearview™ Mobile iOS App provides you with secure connectivity to all of the content (documents) within your enterprise. Whether you use the WSN Clearview ECM platform, Microsoft SharePoint®, Alfresco® or any other document management system (DMS) / enterprise content management (ECM) platform, the versatile WSN Clearview Mobile Client for iOS will provide fast and secure access while you are on the go! The application is designed to provide robust capabilities to meet the needs of all types of users.

The WSN Clearview Mobile Clients are redefining the ECM landscape because they are specifically designed to overcome common content management hurdles and to promote the adoption of casual and power ECM users across the enterprise.

Values and Benefits

- Capture content directly from your iOS device
- Work with content in your Microsoft SharePoint Sites
- Ultrafast document search and retrieve
- View, Listen, Capture and Annotate almost any content

“One of the most interesting things about the Clearview solution is the extent to which Clearview leverages SharePoint Server and the Microsoft Office system – not just as a platform for delivering core ECM functionality – but also as part of the core user experience.

The integration of SharePoint Server and the Office system is pretty much seamless and delivers the power of both the SharePoint Server and Office system document management features in a very comprehensive, Microsoft-oriented user experience.”

Ron Sielinski
Senior Product Manager
Microsoft Office Business Platform

Specifications
