

Improves *any* Repository and Works the way You Work!

product datasheet

WSN Clearview™ Win Client

The WSN Clearview™ Windows Desktop client reduces the complexities created by the growing volume of content in your organization. It addresses the challenges associated with low adoption rates by allowing users to customize their own ECM experience, so they can work the way they work, not how the solution tells them to work. And, these customizations propagate to the IRISS gadget and the web and mobile clients, improving user productivity through a seamless, unified environment. The Windows desktop client has redefined the ECM landscape because it was specifically designed to overcome these issues and promote adoption by casual and power ECM users across the enterprise.

Values and Benefits

- Interoperability with any content management system
- Work with content in SharePoint Sites, Libraries and Folders
- Improve Acceptance and Productivity with our Customizable User Experience
- User Satisfaction Guaranteed!

“One of the most interesting things about the Clearview solution is the extent to which Clearview leverages SharePoint Server and the Microsoft Office system – not just as a platform for delivering core ECM functionality – but also as part of the core user experience.

The integration of SharePoint Server and the Office system is pretty much seamless and delivers the power of both the SharePoint Server and Office system document management features in a very comprehensive, Microsoft-oriented user experience.”

Ron Sielinski
Senior Product Manager
Microsoft Office Business Platform

Specifications

Operating System (OS):
Microsoft Windows XP / 7 / 8 (32/64 bit)

System Ram: 2 GB

System Processor: Dual Core 1 GHz

Imaging Support: TWAIN or ISIS
Compatible Imaging Device

Requirements: WSN Clearview™
Application Server
